

City of Bothell™

The mission statement tells a story. Here is a grass roots political movement in Bothell that has had some extraordinary accomplishments, and should have more in the future.

The Mission Statement:

Our mission is to preserve Wayne land as a recreation and nature corridor for generations to come. We are working with the public, the City of Bothell, King Country and the State of Washington to purchase Wayne Golf Course for the local community.

I am speaking on my own accord and not as a councilmember of Bothell, instead as a citizen of Bothell for over 32 years.

I fully support the efforts of One Bothell. To preserve the Wayne Golf Course and promote the use of open spaces in the Bothell Area for the foreseeable future should be a goal of us all. We too came to this city for the beauty of the rolling river and the spirit of the people to preserve it. We should preserve it for our children and our grandchildren. Imagine the walk of over 5000 feet of waterfront. Of the otters and beavers, the ducks and geese and let us not forget the thousands of crows that commute with us. Should this not be something we all want to preserve?

I am proud of One Bothell, their goals and what they are trying to achieve

Tom Agnew

Bothell City Councilmember
